

HNR 330.001: A Sense of Place: Environmental Art

Cross listed with ART 394

MTWRF 12:15-3:55pm

May 6 through May 26 (three week summer session)

CS 117 and the NKU Woods

Nick Bonner

"Art is not about conquering nature; it is about harmonizing with it."—Andy Goldsworthy

This is a hands-on, outdoor, making art, class. We will begin with formative research and important examples of environmental art (art made in nature, to be enjoyed in nature, made of materials found in nature), then spend 3 weeks planning and creating a collaborative outdoor sculpture in the woods behind the old Honors House (now the NKU Police Station). It will be a lot of work, but the creatirea

SPECIAL PREVIEW FOR PLANNING PURPOSES:
Coming Spring 2025
HNR 311 *Costa Rica Natural History*

In this spring semester class, you will be introduced to basic field research methods involving the study of topical ecosystems and the organisms that live there. Various aspects of Costa Rican history, culture and society will be discussed with an emphasis on the intersection between society and the environment. The field portion of this class will be a part of the Study Abroad program in Costa Rica over spring break. Knowledge of Spanish language not required.

Begin planning now if you are interested in this hybrid on campus and

In this course we will explore human and non-human primate sexualit from a comparative and evolutionary perspective and apply these perspectives to understanding the evolution of human sexualit and reproduction. Students will learn about biological aspects (morphology, physiology, endocrinology, and genetics) and behavioral aspects (mating systems, mate choice, communication, sexual signaling, sexual coercion, and parental investment) of primate reproduction and sexualit. Some sample topics include, the hormonal

Wicked problems describe significant societal problems that are often impossible to solve. Since leadership is ultimately about solving problems, effective leaders must learn to develop strategies that provide resolution to wicked problems such as poverty, homelessness, food insecurity, climate change, economic crisis, and educational access and improvement. In this class, we will consider multiple perspectives as we explore a number of wicked problems in society. Using many leadership skills, such as research, critical thinking, problem-solving and information and digital literacy, we will learn to provide evidence-based analysis leading to effective leadership strategies for our world.
